Although written three days after it, two days after the assassination, this LHM makes no mention of the "mountaintop" part of the King speech, widely interpreted as forecasting the coming assassination. Because this was to be distributed outside the FBI it hides the fact that it had its own people at the 4/3 meeting and instead quotes from the newspapers. It also had police reports on that meeting and what King had said.

After they get past this there is much on the Invaders in this LHM.
